Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/15/2005 has been entered.
2. Claims 6-10, 12 and 13 are pending. No claim is allowed. Amendments are entered.

Response to Remarks

- Declaration filed on 9/21/05 has been considered and was found persuasive therefore rejection over TOWNSON is withdrawn. The rejection under 112 is withdrawn because Applicants have made a clarification of "tensioactive agents".

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 6-10, 12 and 13 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 1. Claim 12 is improperly dependent on claim 6. There in no "humectants" in this claim.
 2. It is unclear what is the meaning of "in the form of ammonium bicarbonate" in claim 6?

3. Claim 13 is improperly dependent on claim 6. There is no "30C" temperature in this claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

Art Unit: 1616

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 6-10, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over KUCHIKATA et al. (US Patent 5,872,078 and 6,22,807). These references teach a herbicidal formulation of glyphosate which embraces presently claimed invention. See the entire documents. KUCHIKATA '078 teaches a dry, water-soluble agriculturally acceptable glyphosate formulation. The formulation may contain humectants. See lines 51-67 in column 2, lines 5-45 in column 3. The glyphosate salt can be prepared by carbonates, bicarbonates and various other bases, see lines 22-34 in column 5. Suitable surfactants are disclosed; see lines 39-67 in column 5, lines 1-15 in column 6. See lines 36-59 in column 6. Furthermore, it teaches that "a slight excess of acid receptor may be preferred, however it is not required when ammonia, ammonium hydroxide or ammonium carbonate is used" see lines 43-49 in column 6. Instant claims differ from the reference in claiming a narrower scope of a broad genus of prior art.

It would have been obvious to one skilled in the art at the time of invention to prepare a solid herbicidal formulation of a glyphosate and a "tensioactive agent", which is a surface-active agent in a solid form because the reference teaches sodium bicarbonate and glyphosate. Since no criticality and/or unexpected results are seen presently claimed invention is considered *prima facie* obvious over the prior art.

A reference is good not only for what it teaches by direct anticipation but also for what one of ordinary skill might reasonably infer from the teachings. *In re opprecht* 12 USPQ 2d

Art Unit: 1616

1235, 1236 (Fed Cir. 1989); *In re Bode* 193 USPQ 12 (CCPA 1976). A reference is not limited to working examples. *In re Fracalossi* 215 USPQ 569 (CCPA 1982).

Accordingly, the burden of proof is upon applicants to show that instantly claimed subject matter is different and unobvious over those taught by prior art. See *In re Brown*, 173 USPQ 685, 688; *In re Best*, 195 USPQ 430 and *In re Marosi*, 218 USPQ 289, 293.

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that the subject matter defined by the instant claims would have been obvious within the meaning of 35 U.S.C. 103(a).
